Haien Peng

Email: Haien.Peng@UTDallas.edu

Education

- **The University of Texas at Dallas** — Richardson, TX, United States
  Ph.D. in Economics — *Aug. 2023 - Present*
  Research Field: *Econometrics*

- **University of Southampton** — Southampton, United Kingdom
  Master of Science in Finance and Econometrics — *Sept. 2021 - Sept. 2022*
  Relevant Coursework: *Asset Pricing, Quantitative Methods, Time Series Econometrics, Financial Derivatives, Financial Econometrics, Corporate Finance, Economic Analysis, Experimental Economics*

- **Shanghai University** — Shanghai, China
  Bachelor of Management in Information Management and Information System — *Sept. 2015 - July 2019*
  Relevant Coursework: *Accounting, Probability and Statistics, Finance, Game Theory, Microeconomic/Macroeconomic Theory, Database Application*

Research Experience

- **Quantitative Method in the Chinese Stock Market** — Southampton, United Kingdom
  Supervisor: Prof. Jose Olmo — *July. 2022 - Sept. 2022*
  - Compared the predictive performance of 3 quantitative methods and a single linear model and 5 Autoregressive models in the Chinese A-share market by using the entire cross-section of lagged returns as predictors.
  - Compared the prediction accuracy between different methods and calculated the increment of R-squared, and confirmed that the quantitative methods improved the prediction accuracy compared with the traditional Autoregressive models or simple linear model.

- **Improvement and application of mean-variance models** — Southampton, United Kingdom
  Supervisor: Prof. Jose Olmo — *June 2022 - Sept. 2022*
  - Used Bayes estimator to improve on traditional Mean-Variance optimization and Minimum-Variance optimization, compared the improved models with the original optimizations and naive portfolio strategy.
  - Tested five asset allocation models separately on the SSE 50 Index dataset by using rolling window method, compared the performance of these models with different rolling window sizes and different risk aversion factors, and finally found that the traditional minimum-variance optimization performed best in this dataset.

Work Experience

- **Guangzhou Wanyun Information Technology Co. Ltd.** — Guangzhou, China
  Finance Intern — *Aug. 2019 - Oct. 2019*
  - Create and manage accounting vouchers and accounting books
  - Oversee the filing and reconciliation of financial accounts; prepare financial statements
  - Handle accounting for wages and individual income tax declarations
  - Review the reimbursements

- **Zhongbiao Network Technology Co. Ltd.** — Shanghai, China
  Intern — *June 2018 - July 2018*
  - Configured the crawler tools; mastered the protocol as per the provided data
  - Finalized the formatting for the access data; tracked the holistic data parsing process
  - Maintained a high-caliber of data after data access

Honors

- Graduation Thesis titled *Recommendation Algorithm Based on User-Based Implicit Factors* won the Excellent Graduation Design (Thesis) Award (11/2019)
- Paper titled *Regional Instability: Multiple Criteria Decision Making Model Focus On Climate Change* earned Honorable Mention in the Interdisciplinary Contest in Modeling (02/2018)

Skills

- Technical skills: R Language, Spss, STATA
